02 What this is

The Instagram is where most fans first meet her. The profile has to look real at first glance: a real profile picture, a name, a bio, posts that show her life. Made from the phone's Gmail, never from a phone number.

> ABOVE ALL
> The phone **never** joins a Wi-Fi network: not the office, not home, not a café. Not once, not for a second. The only thing it ever connects to is **a phone's hotspot**: your own, or another work phone's.

03 Before you start

- ☐ The phone is set up and has its Gmail (SOPs: Setting Up the Phone, then Creating a Gmail).

- ☐ The phone is on the hotspot.
- ☐ Her profile picture and first posts are ready (SOP: Creating Pictures).
- ☐ A niche username idea.
- ☐ The company login sheet open.

04 Step by step

1 Open Instagram, create new account

Open the app. Press **Create new account**.

2 Use the email, not a phone number

Choose **sign up with email**. Type the phone's Gmail. Put in the code Instagram sends to that Gmail.

3 Make a password

A password **different from the Gmail's**. Save it in the login sheet now.

4 Birthday and name

Her name. Birthday: **TO BE FILLED** · which birthday to use

5 Niche username

A username that speaks the niche. **TO BE FILLED** · the username format, with an example

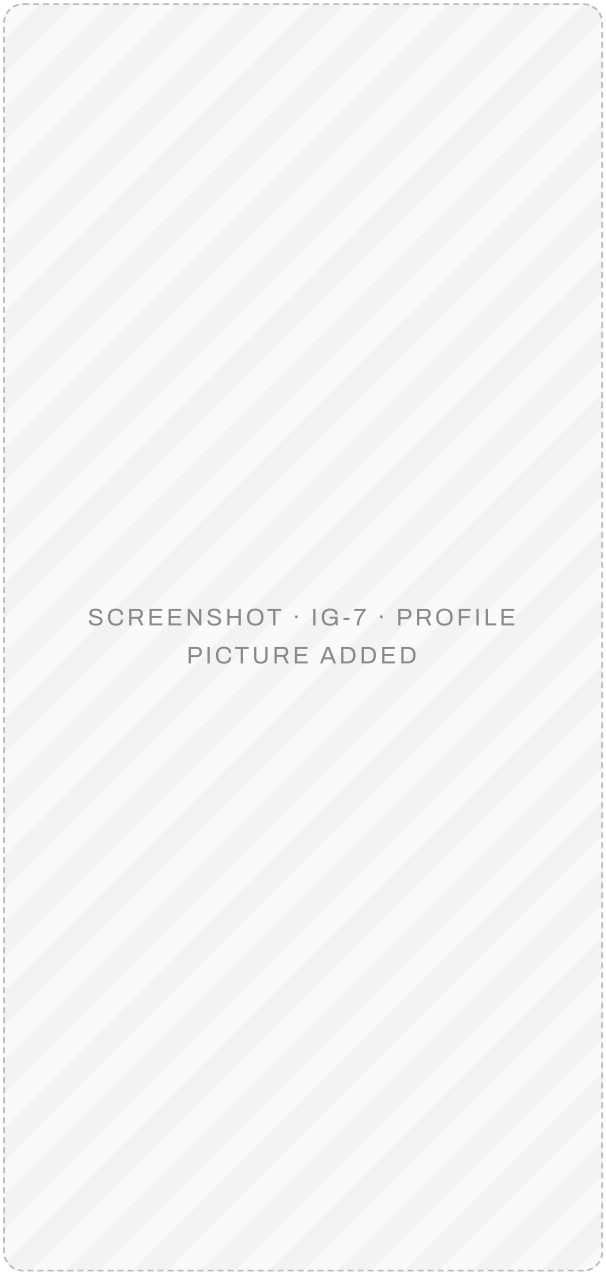

6 Skip everything

Contacts, people to follow, Facebook link, notifications: **skip all of it.**

7 Profile picture

Add her profile picture (SOP: Creating Pictures). Clear face, she looks good, the niche is in it.

8 Bio

TO BE FILLED · what goes in the bio, with an example

9 First posts

Lifestyle posts and carousels, so the profile has life. **TO BE FILLED ·** how many posts before day 2, as in the profiling Loom

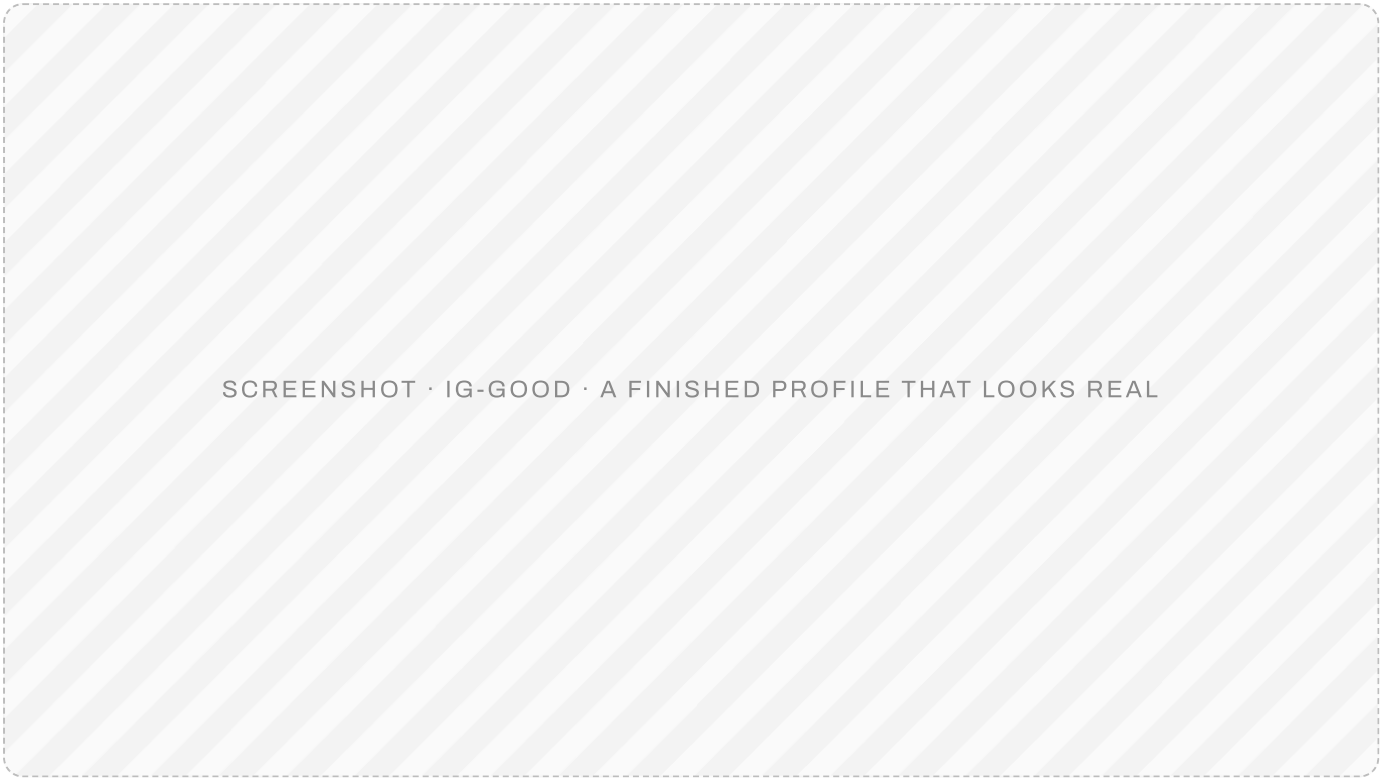

10 Day 1 warm up only

Explore page. Tap a post, come off it. Another post, come off it. **5–10 minutes.** Never scroll the feed. Never open Reels. Day 2 onwards is in the Warm Up SOP.

05 What the profile should look like

Open it as if you were a fan. Would you believe she's real?

06 Done means

- ☐ Made with the Gmail, no phone number.
- ☐ Profile picture, name, niche username and bio are in.
- ☐ The first posts are up.
- ☐ Email, username and password are in the company login sheet.
- ☐ Day 1 warm up done: Explore only, 5–10 minutes.

07 Common mistakes

- **Signing up with a phone number.** Always the email.
- **The same password as the Gmail.**
- **Scrolling or opening Reels on day 1.**
- **An empty profile.** No picture, no bio, no posts looks fake.

Question not in here?

Read this SOP first. If the answer isn't here, **you must tell K and ask him.** Your question then gets added, so the next person finds it.
