Setting Up the Phone

How we set up a new Samsung so it is ready for accounts. Every account starts here. Watch the video first, then follow this step by step, every time.

Version **v0.1** Updated **10 Nov 2026** Owner **K** For **posters** Tool **Samsung phone · hotspot**

01 Watch first

Setting up a Samsung for the first time. Watch it once for the flow.

⚠ READ THIS BEFORE YOU WATCH

This video is NOT how we do it. It is only here so you see the flow and what the screens look like. Where the video and this SOP are different, **this SOP wins.** Follow the steps below, every time.

Video not playing? Open it here: https://www.youtube.com/watch?v=0bgKh1Z6gc8

02 What this is

Every account lives on its own phone. The phone has to look like a normal person's phone: no Samsung account, nothing shared, nothing linked. When it's set up, the Gmail is next (SOP: Creating a Gmail), then Instagram, Facebook and Threads.

> ABOVE ALL
>
> The phone **never** joins a Wi-Fi network: not the office, not home, not a café. Not once, not for a second. The only thing it ever connects to is **a phone's hotspot**: your own, or another work phone's.

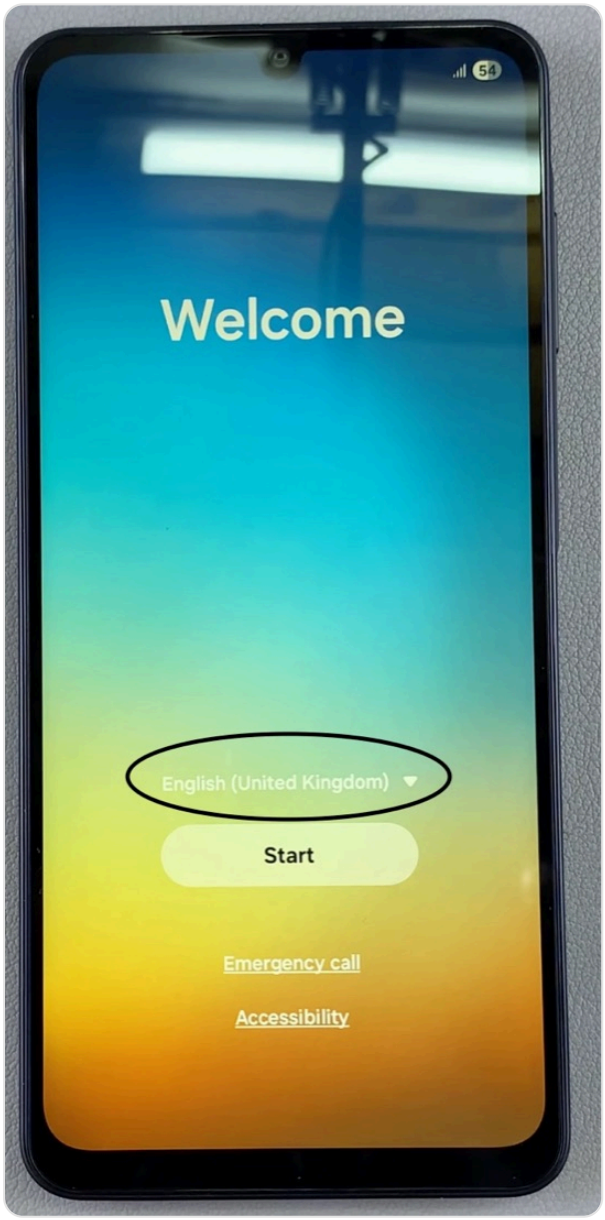

03 Before you start

- ☐ The Samsung, charged, with its SIM card in.
- ☐ A hotspot you can use: your own phone, or another work phone.
- ☐ The company login sheet open on your laptop.

04 Step by step

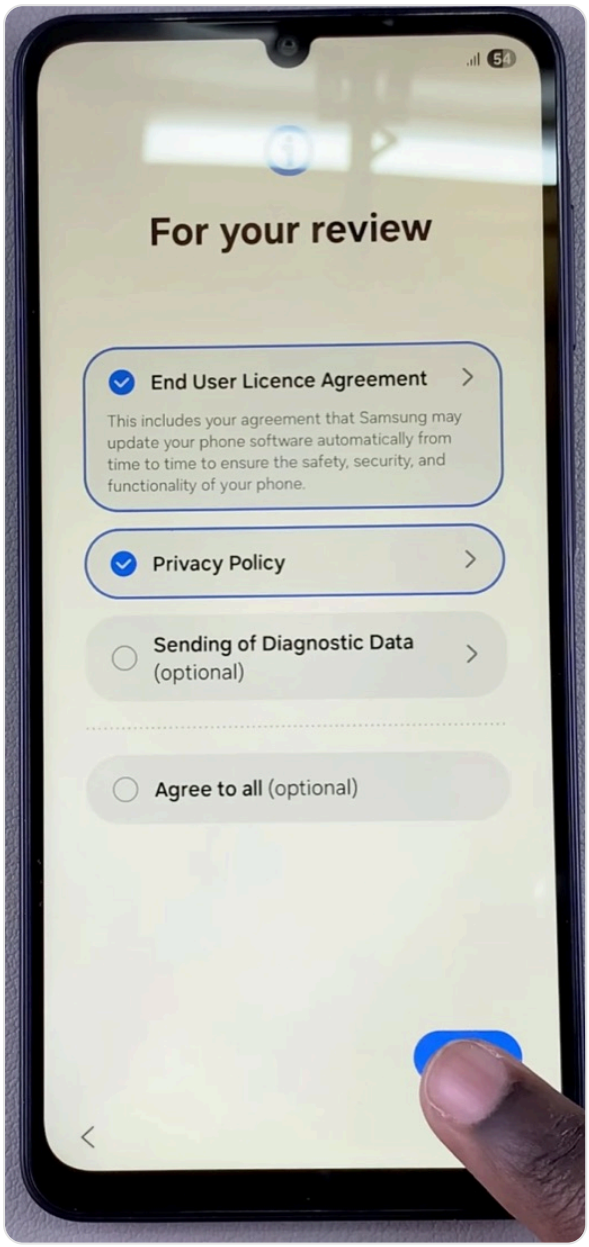

1 Welcome: English (United States)

Tap the language. Choose **English (United States)**, not United Kingdom. Press Start.

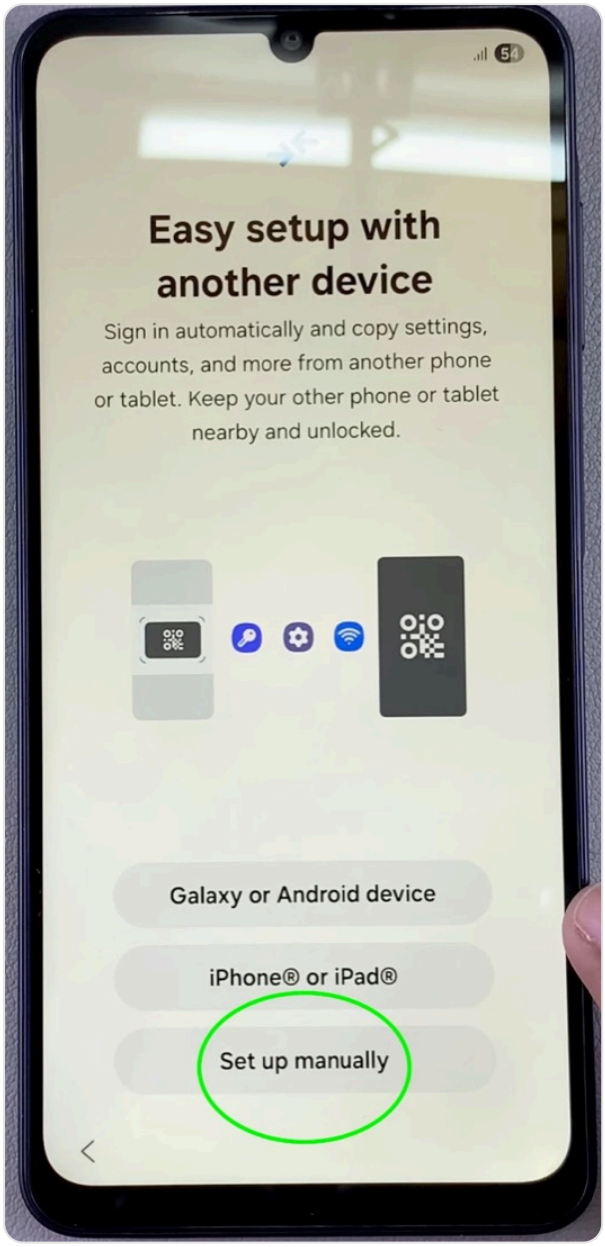

2 For your review

End User Licence Agreement and Privacy Policy: ticked. **Sending of Diagnostic Data: leave it empty.** Don't press Agree to all. Press Next.

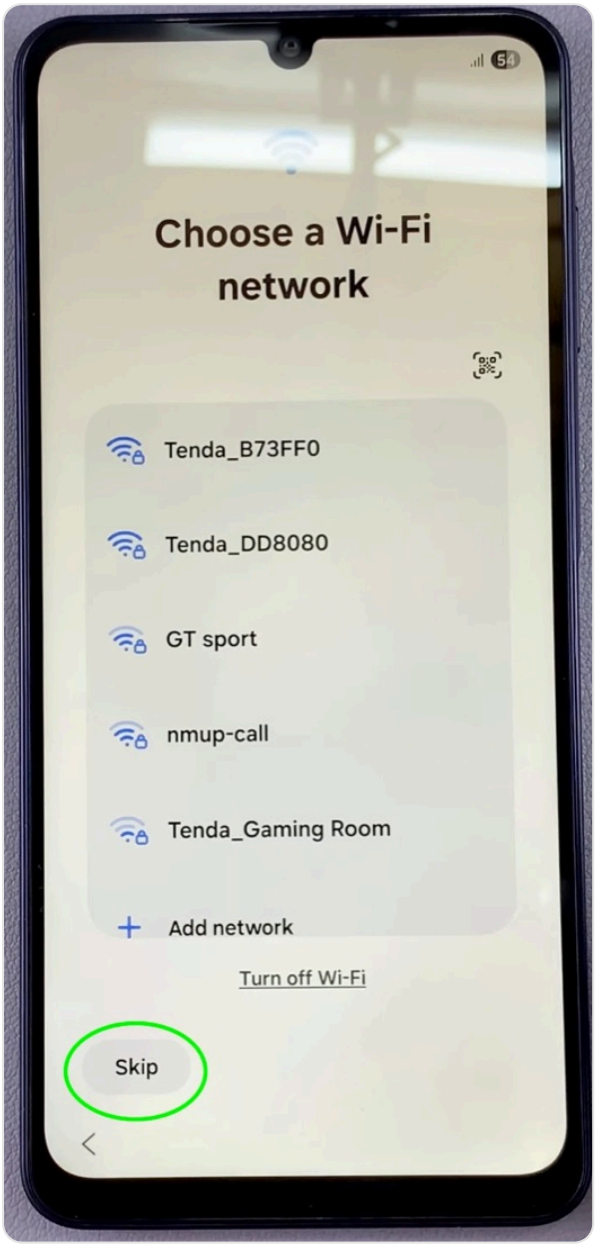

3 Set up manually

Don't copy anything from another phone. Press **Set up manually**.

4 Wi-Fi: Skip

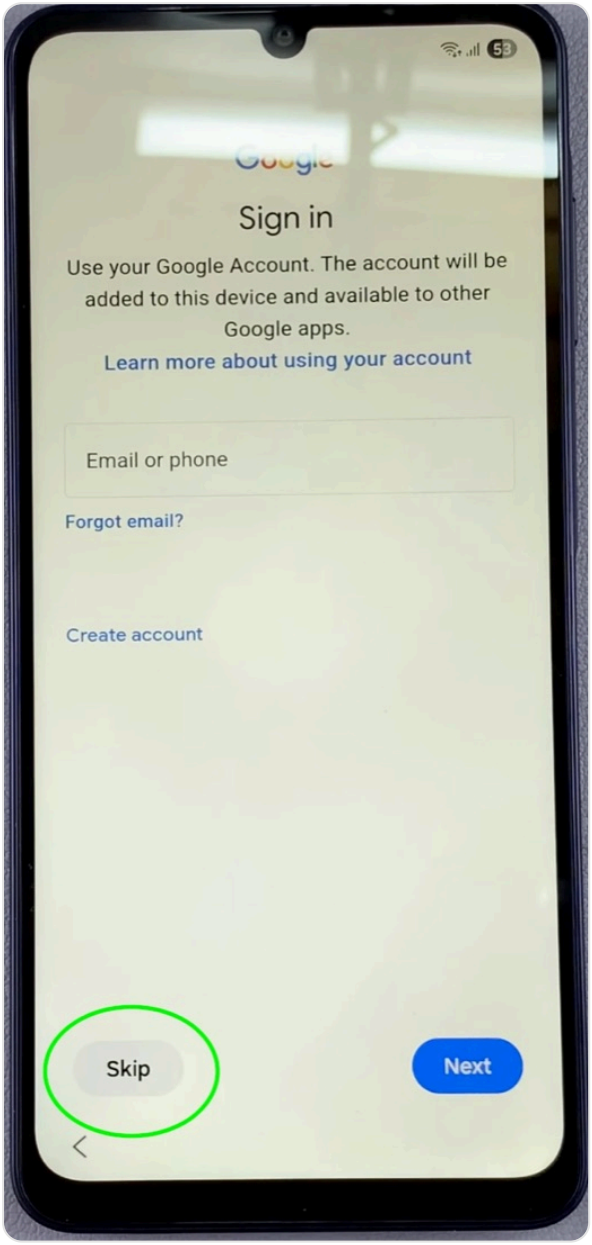

It shows Wi-Fi networks. **Press Skip.** Never connect to any of them.

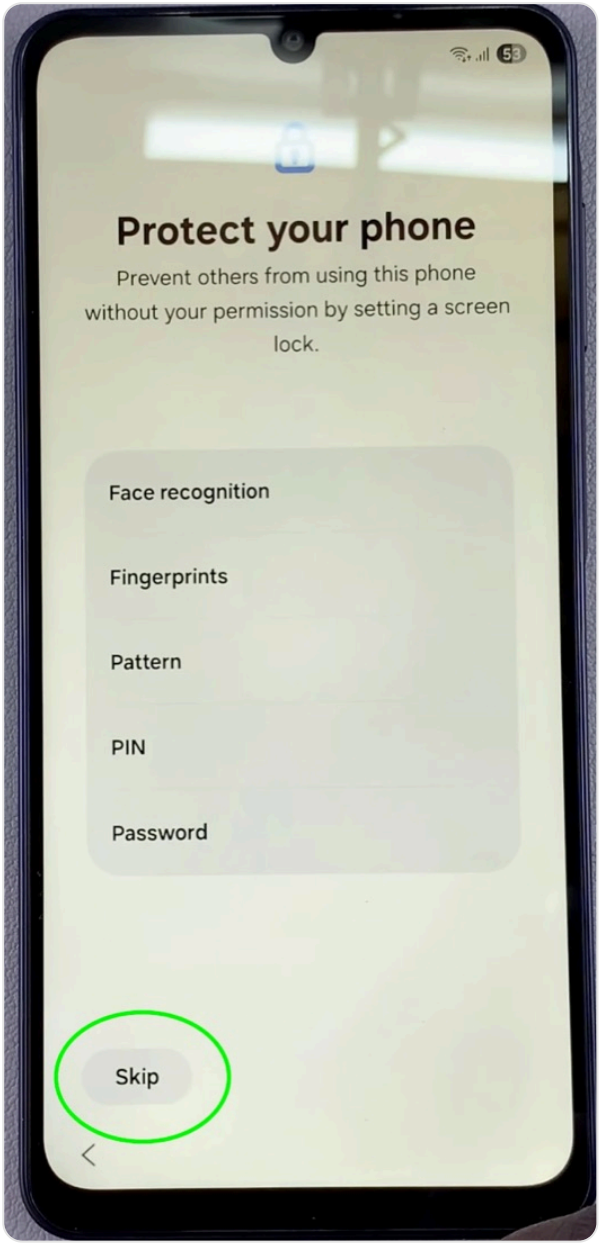

5 Google sign in, screen lock: Skip

Google sign in: **Skip**. Protect your phone (face, fingerprint, PIN, password): **Skip**.

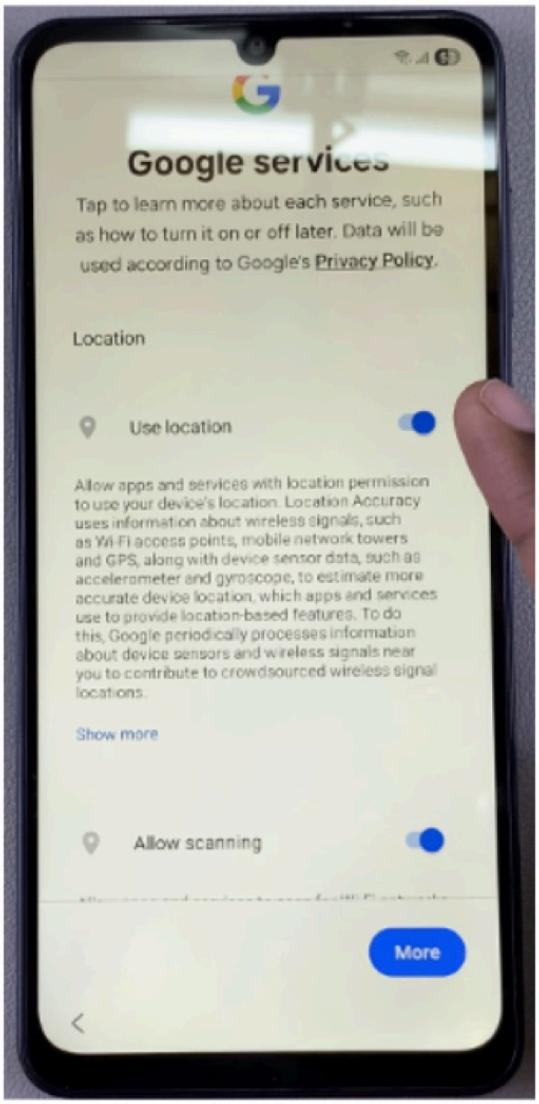

The screen lock can be done later.

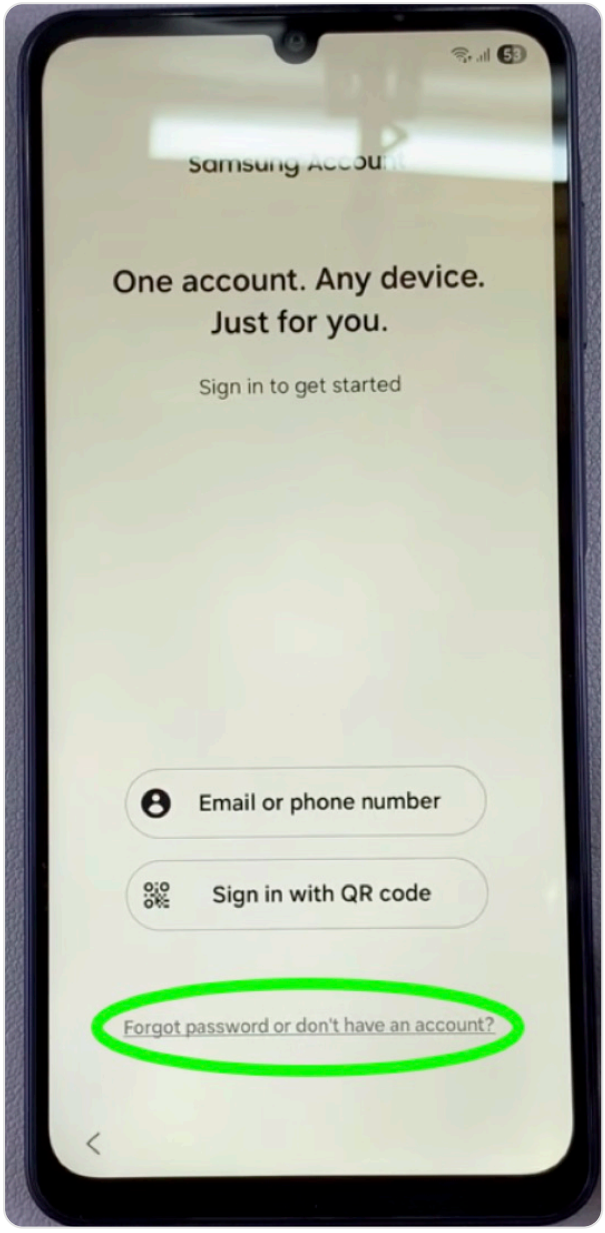

6 Google services: turn everything off

Every toggle off: Use location, Allow scanning, and everything under them. Press More until you reach the end, turning each one off.

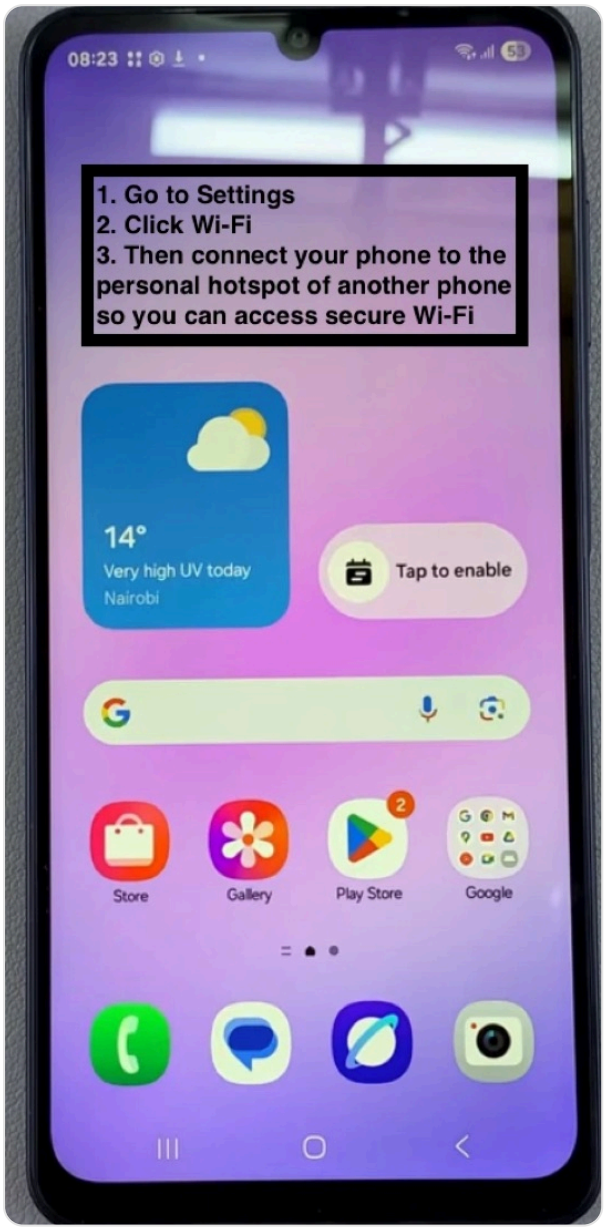

7 No Samsung account

Don't open a Samsung account. Don't give any information. Press **Skip** if you see it. If you don't: press **Forgot password or don't have an account?**, then continue and skip. Skip everything until you're on the home screen.

8 Connect to a hotspot

On the home screen: **Settings → Wi-Fi →** connect to the **personal hotspot of another phone**. That's the only connection this phone ever uses.

9 Download and update the apps

Open the Play Store. Download or update **Gmail, Instagram, Facebook and Threads**, plus anything else the phone asks to update. Nothing else.

The company account isn't logged in on the Play Store? **Message K on Telegram.**

05 Done means

- ☐ The phone is on the home screen and has **never** joined a Wi-Fi network.
- ☐ No Samsung account. Diagnostic data off. Every Google toggle off.
- ☐ It's on a phone's hotspot.

- ☐ Gmail, Instagram, Facebook and Threads are installed and up to date.
- ☐ Next: SOP Creating a Gmail.

06 Common mistakes

- **Connecting to the office Wi-Fi "just for a second".** Never.
- **English (United Kingdom)** left as the language.
- **Pressing Agree to all**, which ticks diagnostic data.
- **A Google toggle left on.** Check them all.
- **Making a Samsung account.** Skip it.

TO BE FILLED · Added after every review with K

Question not in here?

Read this SOP first. If the answer isn't here, **you must tell K and ask him.** Your question then gets added, so the next person finds it.

07 What changed
