Creating an Instagram

How we make her Instagram and make it look like a real girl's profile. Watch the video first, then follow this step by step, every time.

Version **v0.1** Updated **10 Nov 2026** Owner **K** Tool **Instagram app · Samsung**

01 Watch first

How to create an Instagram account. Watch it once for the flow.

> ⚠ READ THIS BEFORE YOU WATCH
>
> A good video for the flow. **Our rules are different in a few places:** email not phone number, her name, her niche username, no contacts. Where they differ, **the steps win.**

Video not playing? Open it here: https://www.youtube.com/watch?v=EIEd8BafC60

Instagram Profiling Example (Loom). Watch all of it before you start. Come back to it any time.

02 What this is

The Instagram is where most fans first meet her. The profile has to look real at first glance: a real profile picture, her name, a bio, and posts that show her life. Made from the phone's Gmail, never from a phone number.

> ⚠ THE RULES THAT GET ACCOUNTS BANNED
>
> **NEVER CONNECT THE PHONE TO WI-FI. HOTSPOT ONLY.**
>
> **NEVER DOWNLOAD A PICTURE FROM GOOGLE DRIVE ONTO THE PHONE. ALWAYS OPEN IT AND TAKE A SCREENSHOT.**

The apps can see where a picture came from and how the phone connects. Break one of these and the account gets banned.

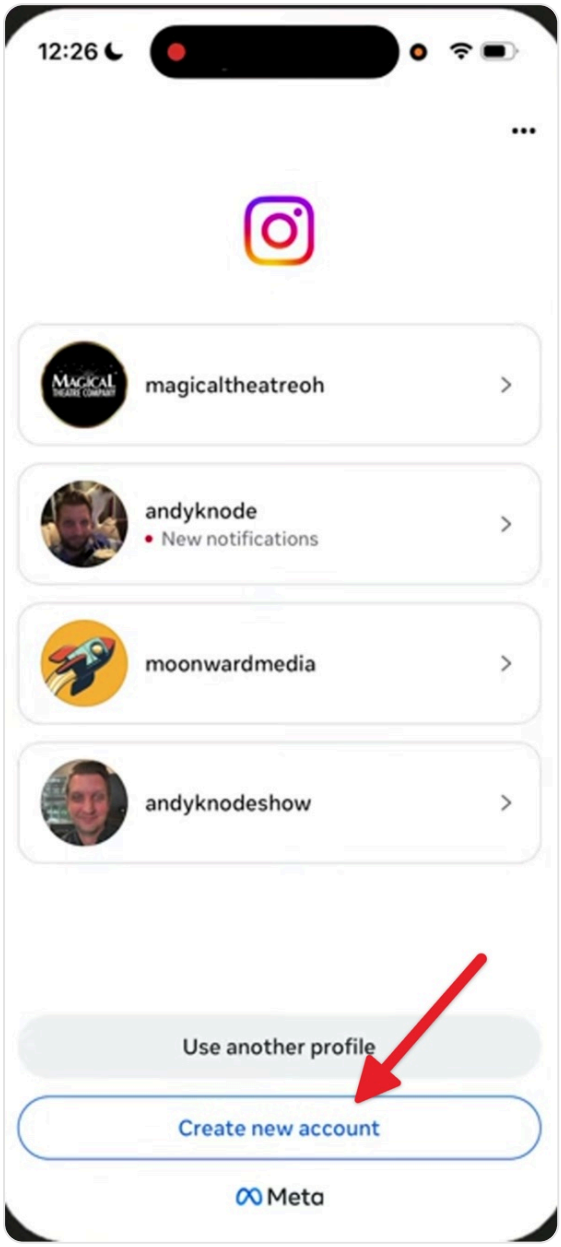

03 Before you start

- ☐ The phone is set up and has its Gmail (SOPs: Setting Up the Phone, Creating a Gmail).
- ☐ The phone is on a hotspot.
- ☐ Her Gmail, password and birthday from the company login sheet. Instagram uses the same.
- ☐ Her profile picture is ready (SOP: Creating Pictures), in Google Drive.
- ☐ Her niche: Star Trek, Star Wars or Lord of the Rings (her model deck).

04 # Step by step

1 Create new account

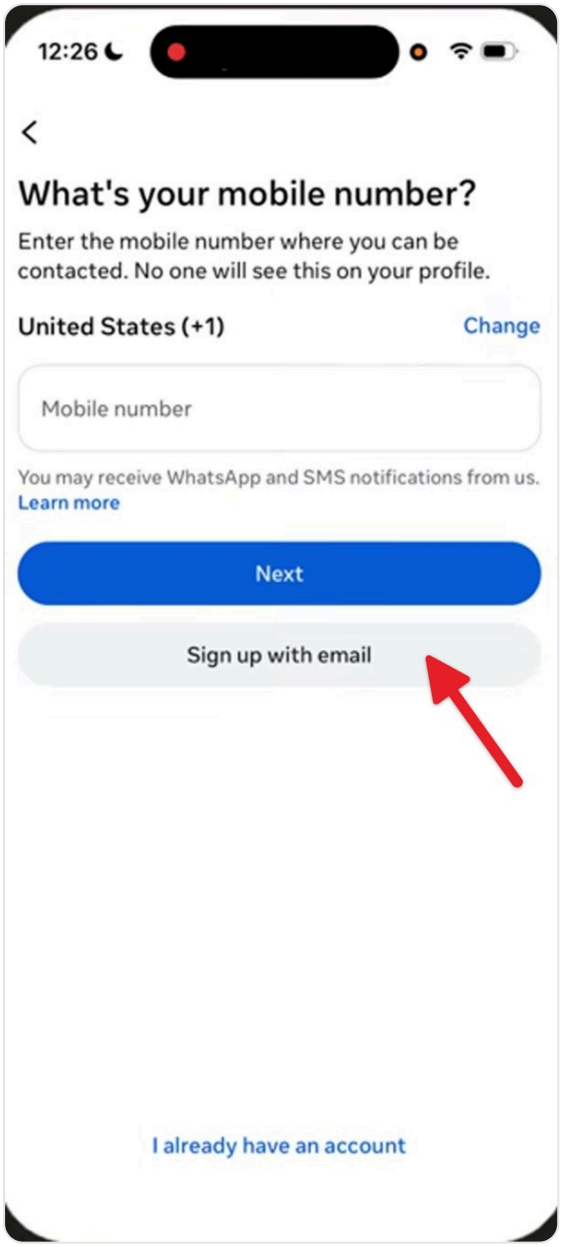

Open Instagram. Press **Create new account**.

2 Sign up with email

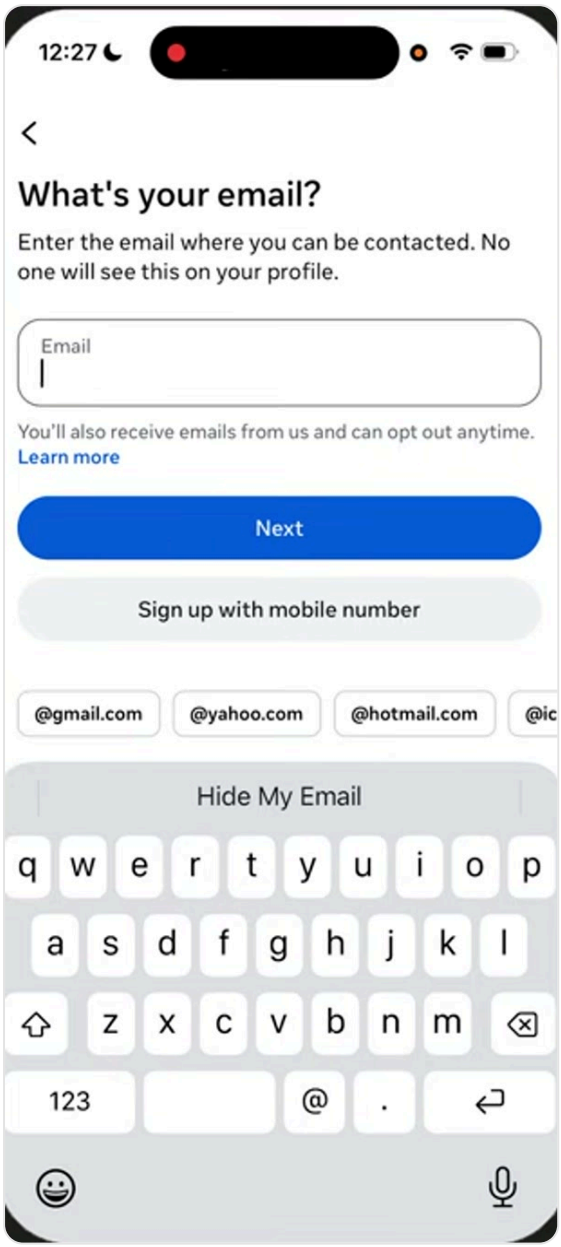

It asks for a mobile number. **Never.** Press **Sign up with email**.

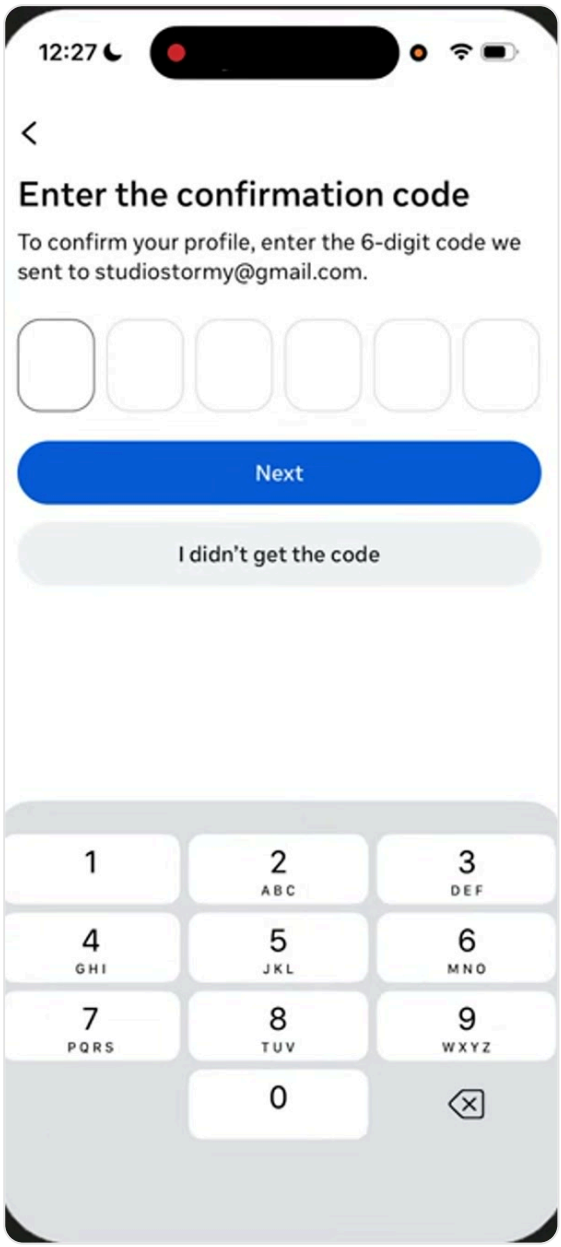

Why: a number ties the account to a real SIM and to every other account on it. The email keeps each account on its own.

3 Her Gmail, then the code

Type her Gmail. Open the Gmail app, copy the 6-digit code Instagram sent, put it in.

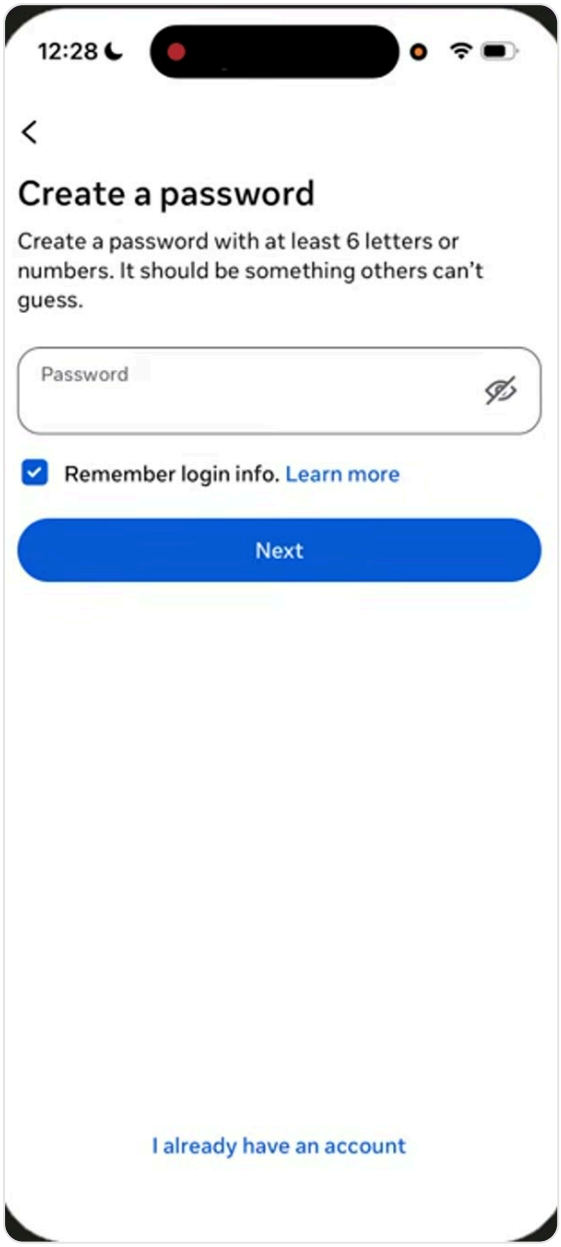

4 Password: the same as the Gmail

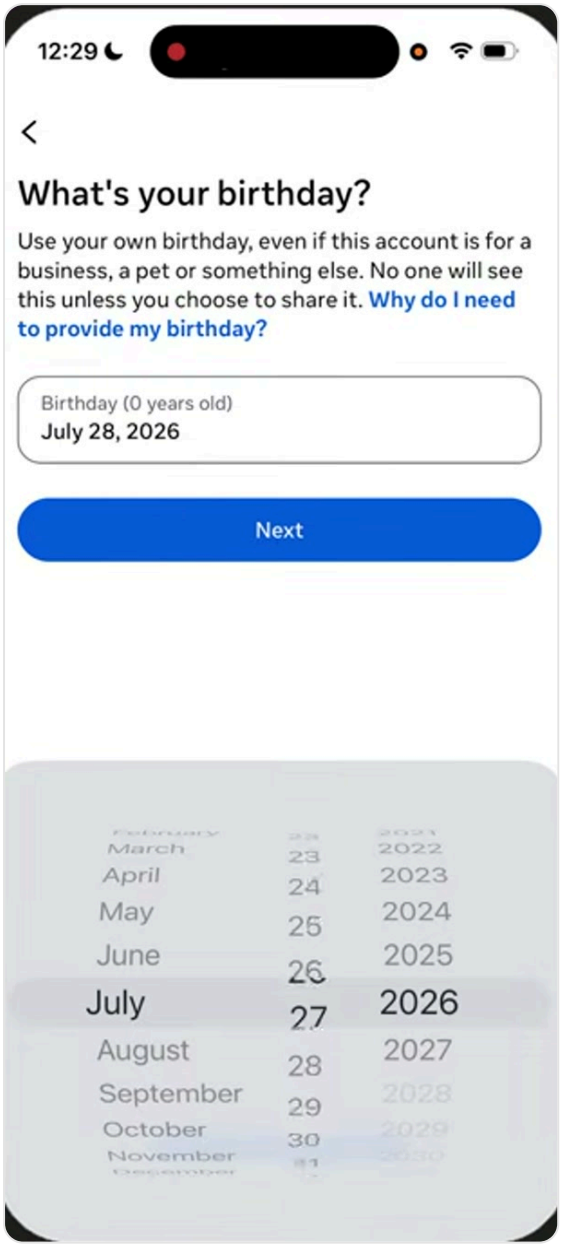

Use **the same password as her Gmail.** Tick Remember login info.

Why: one password per model, already in the sheet. Nothing to forget, nothing to mix up.

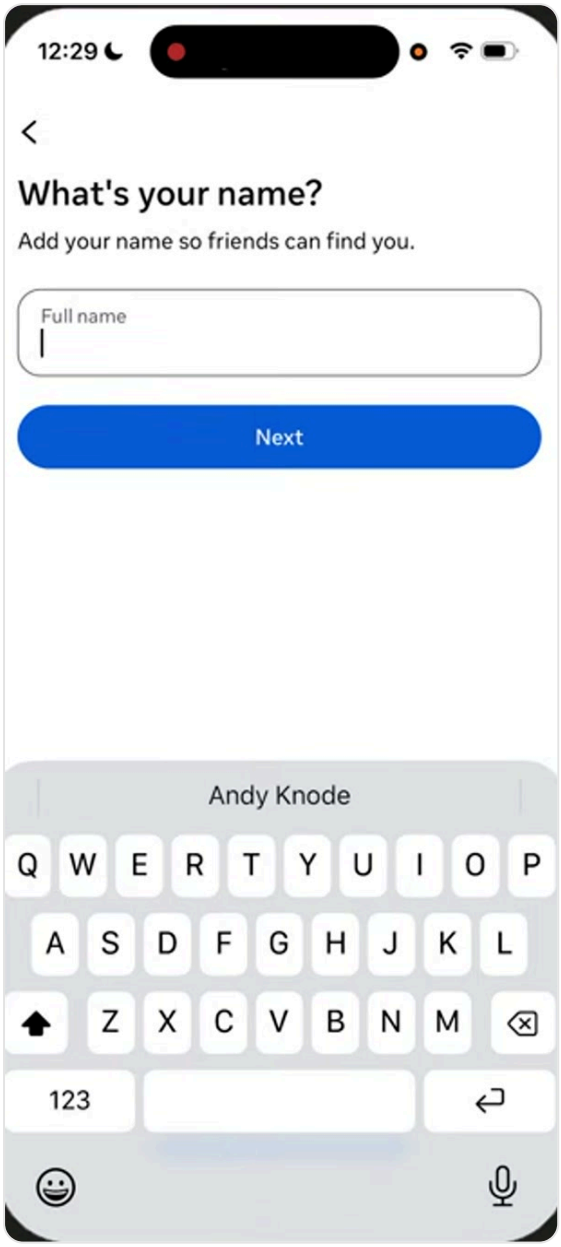

5 Birthday: the same as the Gmail

The same birthday as her Gmail (she is 19 or 20).

6 Her full name

Her full name, as in her model deck. Example: Kira Rhodes.

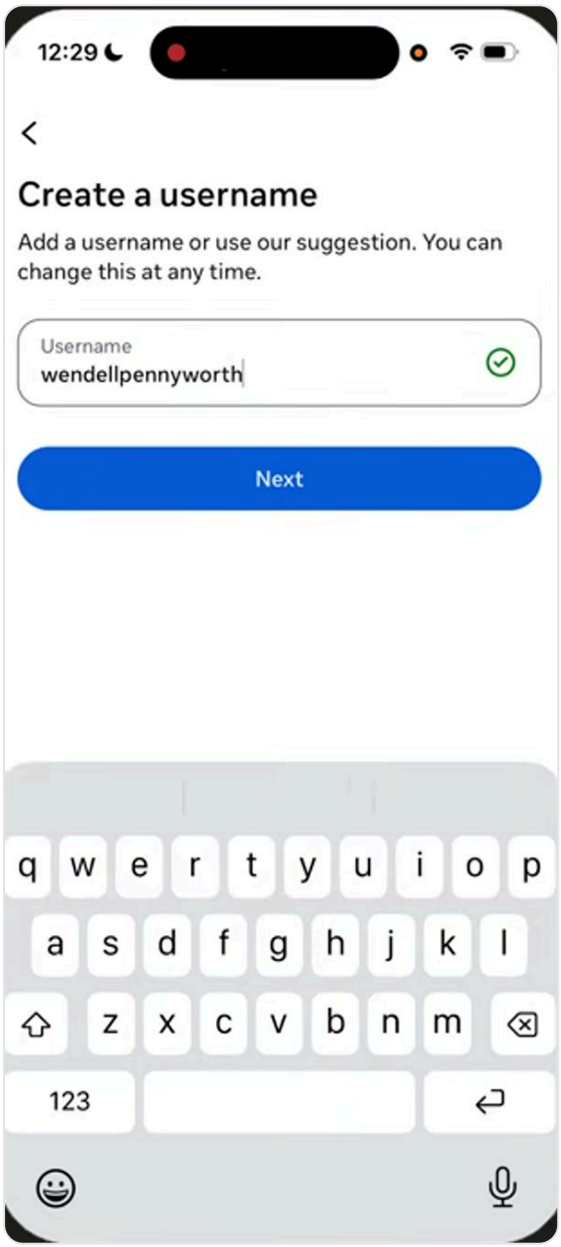

7 Username: her name and her niche

Girly, her name, and her niche in it. **Never numbers.**

Examples: **padawangrace** (Star Wars) · **kiraofvulcan** (Star Trek) · **sophieofmordor** (Lord of the Rings)

Taken? Change a letter or a word, not a number: sophievalinor, kiraofvulcann.

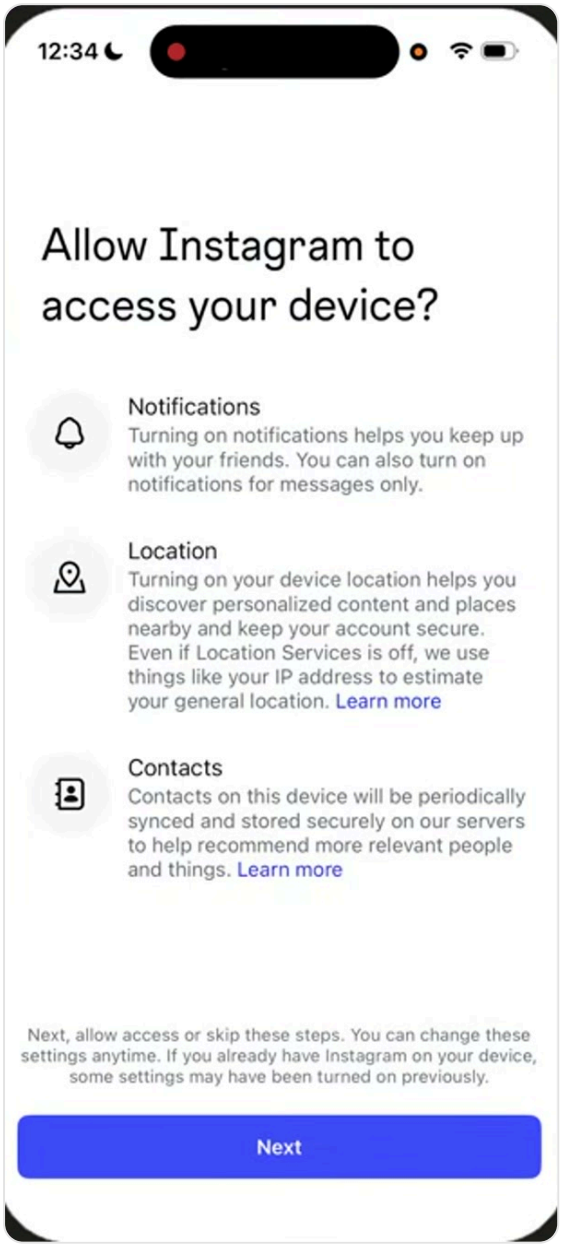

Why: numbers look like a bot or a spam account. Her name and her niche tell a fan who she is in one second.

8 Notifications yes, contacts never

Allow access to your device: **Notifications: yes. Contacts: never. Location: never.**

Why: contacts and location link the account to the phone's real owner and to every other phone in the same room. Instagram connects accounts that way.

9 Profile picture

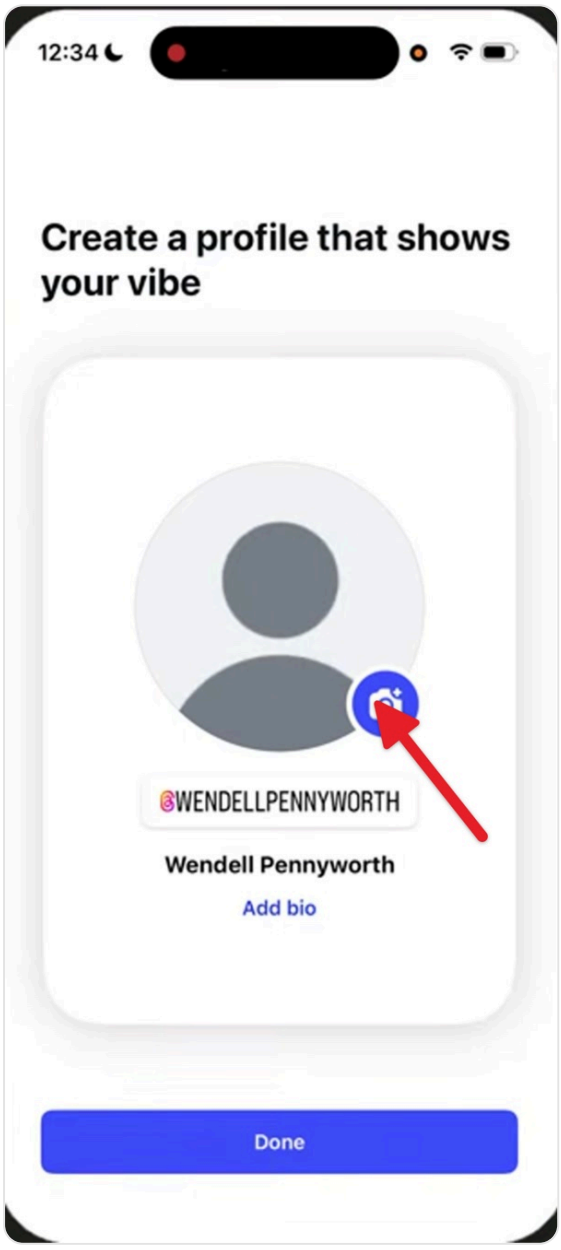

Pick one of her **profile-picture-style** pictures (SOP: Creating Pictures). Open it in Google Drive, **take a screenshot**, crop the screenshot, and use that.

Examples · tap to open

NEVER download it from Google Drive. Always the screenshot.

Why: a downloaded file keeps where it came from. A screenshot is a fresh picture taken on this phone.

10 Bio

Short, girly, her niche in it, an emoji or two. ChatGPT can help you write it: give it her name, her niche and these examples.

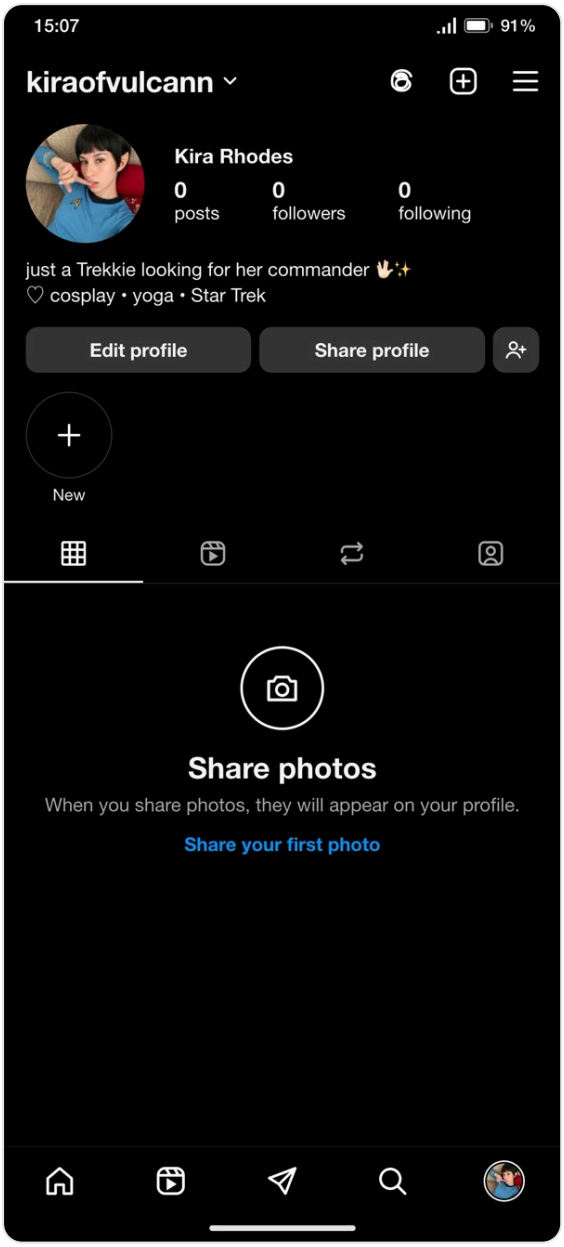

Kira: **just a Trekkie looking for her commander 🖖✨ ♡ cosplay • yoga • Star Trek**

Sophie: **just a girl who belongs in Middle-earth🌿 still waiting for someone to take me there💞**

This bio stays until the account has 750–1,000 followers. Then it changes, to send fans to her link.

11 Skip the rest

Follow suggestions, connect contacts, Facebook: **skip.** You land on her profile.

12 Hide AI comments

Do this the moment the account exists. Before anything gets posted.

Fans who find her have to feel she is real. One "this is AI" comment under a post and everyone who reads it starts to wonder. So the account hides those comments before anyone sees them.

Where: Profile → ≡ → **Privacy → Hidden Words → Manage custom words and phrases**.

Paste this list in, then turn **Hide comments ON**:

```
ai, a.i, a.i., fake, deepfake, bot, scam, gpt, chatgpt, slop, faked, not real, midjourney
```

13 Day 1 warm up only

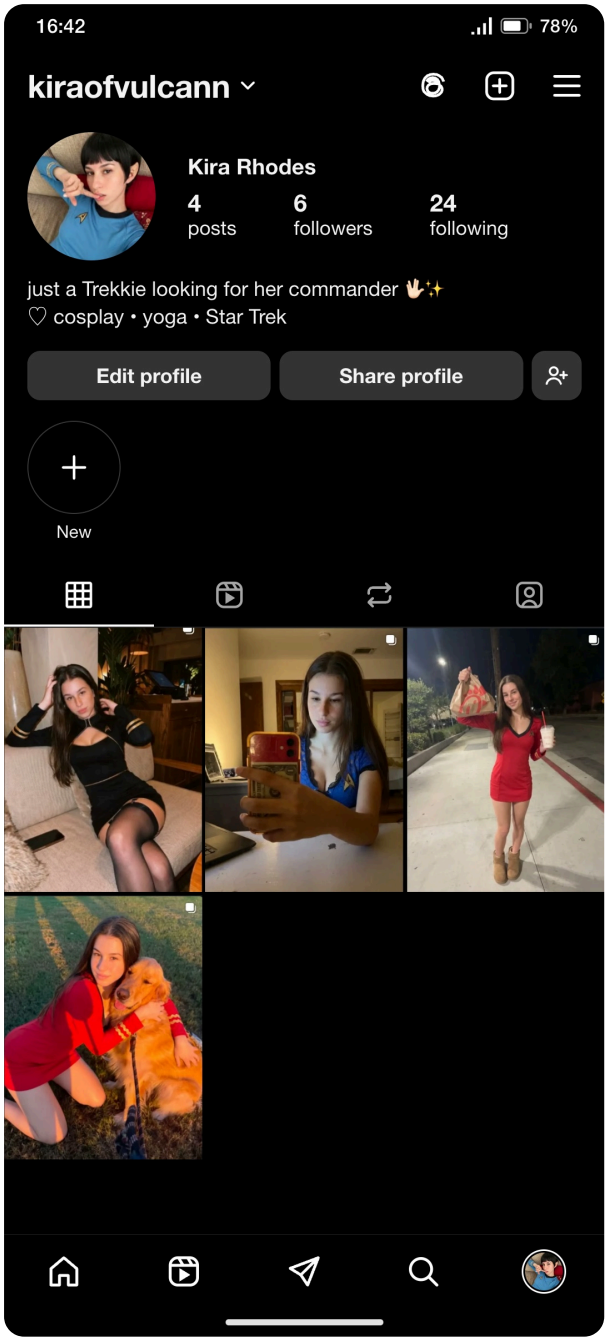

Explore page. Tap a post, come off it. Another post, come off it. **5–10 minutes.** Never scroll the feed. Never open Reels.

Nothing gets posted yet.

Why: a new account that scrolls hard or posts straight away looks like a bot. A quiet first day looks like a real person.

14 First posts: after 24 hours of warm up

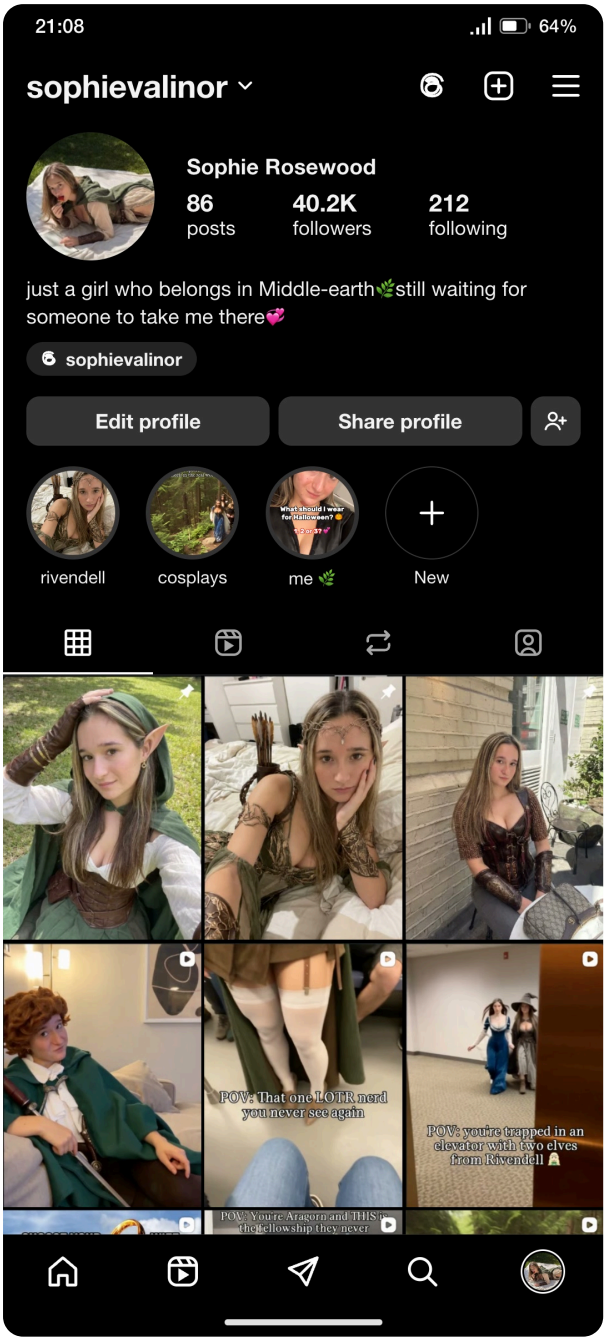

Not before. After 24 hours of warm up, post her first pictures: lifestyle posts and carousels, so the profile has life. This is a new account after its first 4 posts:

Kira: a new account after its first 4 posts. Profile picture, full name, niche username, bio.

05 What the profile should look like

When it's been running a while. Open it as if you were a fan: would you believe she's real? **Ignore the follower numbers**; look at the picture, the name, the bio and the grid.

Sophie: a running account. Her face, her niche, her life, pinned posts, reels and highlights.

06 Done means

- ☐ Made with her Gmail, no phone number.
- ☐ Same password and birthday as the Gmail.

- ☐ Her full name, a niche username with no numbers, a bio.
- ☐ A profile picture from a screenshot, never a download.
- ☐ Notifications on, contacts never.
- ☐ **Hidden Words in, Hide comments on.**
- ☐ The username is in the company login sheet.
- ☐ Day 1 warm up done. No posts until 24 hours of warm up.

07 Common mistakes

- **Signing up with a phone number.** Always the email.
- **Numbers in the username.**
- **Downloading the picture from Drive** instead of a screenshot.
- **Allowing contacts.**
- **Posting before 24 hours of warm up.**
- **Scrolling or opening Reels on day 1.**
