02 What this is

Threads runs on her Instagram: you log in with it, and it copies her profile across. On Threads, pictures matter the most, in posts **and in replies**. Make the Instagram first.

⚠ THE RULES THAT GET ACCOUNTS BANNED

NEVER CONNECT THE PHONE TO WI-FI. HOTSPOT ONLY.

NEVER DOWNLOAD A PICTURE FROM GOOGLE DRIVE ONTO THE PHONE. ALWAYS OPEN IT AND TAKE A SCREENSHOT.

The apps can see where a picture came from and how the phone connects. Break one of these and the account gets banned.

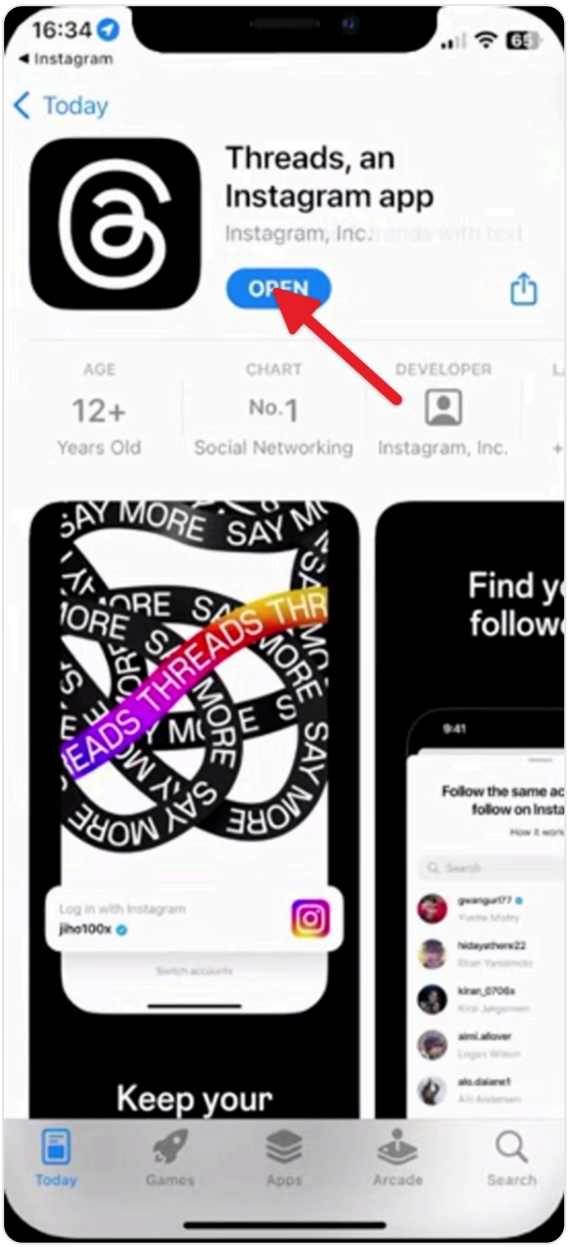

03 Before you start

- ☐ Her Instagram is made, on this phone (SOP: Creating an Instagram).
- ☐ The phone is on a hotspot.
- ☐ Her pictures are ready (SOP: Creating Pictures).

04 # Step by step

1 Open Threads

Open the Threads app (installed when the phone was set up). Not there? Play Store → **Threads** → Open.

2 Log in with Instagram

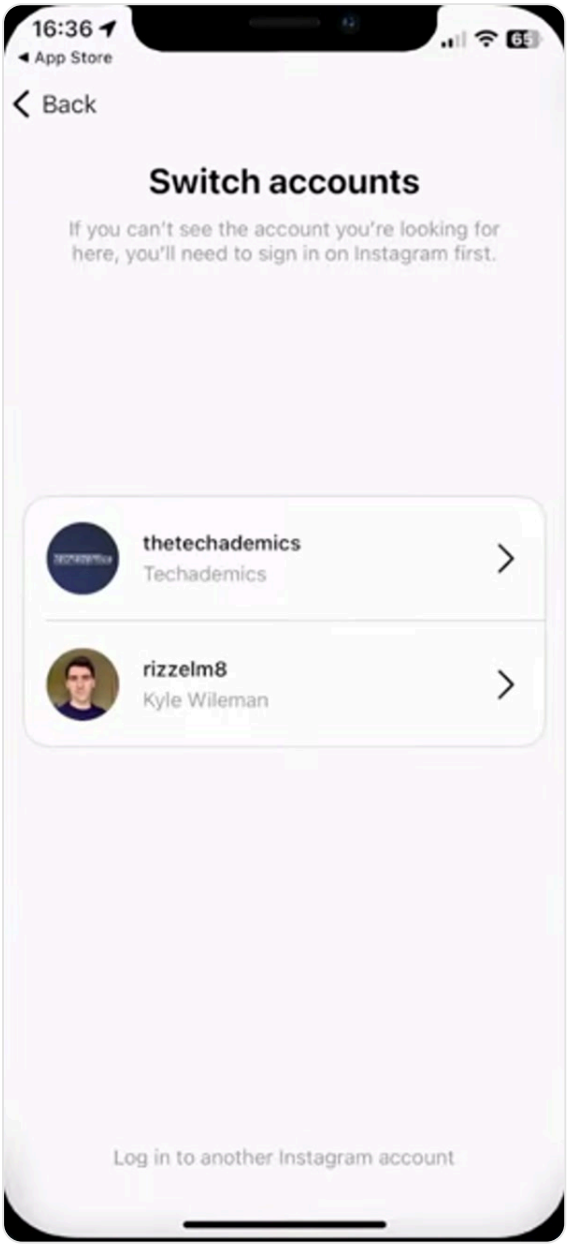

At the bottom it shows her Instagram. Press **Log in with Instagram**.

3 Check it is her account

If it shows a list, pick **her** Instagram. Not there? **Log in to another Instagram account** with her username and password from the sheet.

Wrong account = the wrong model on Threads. Check the name.

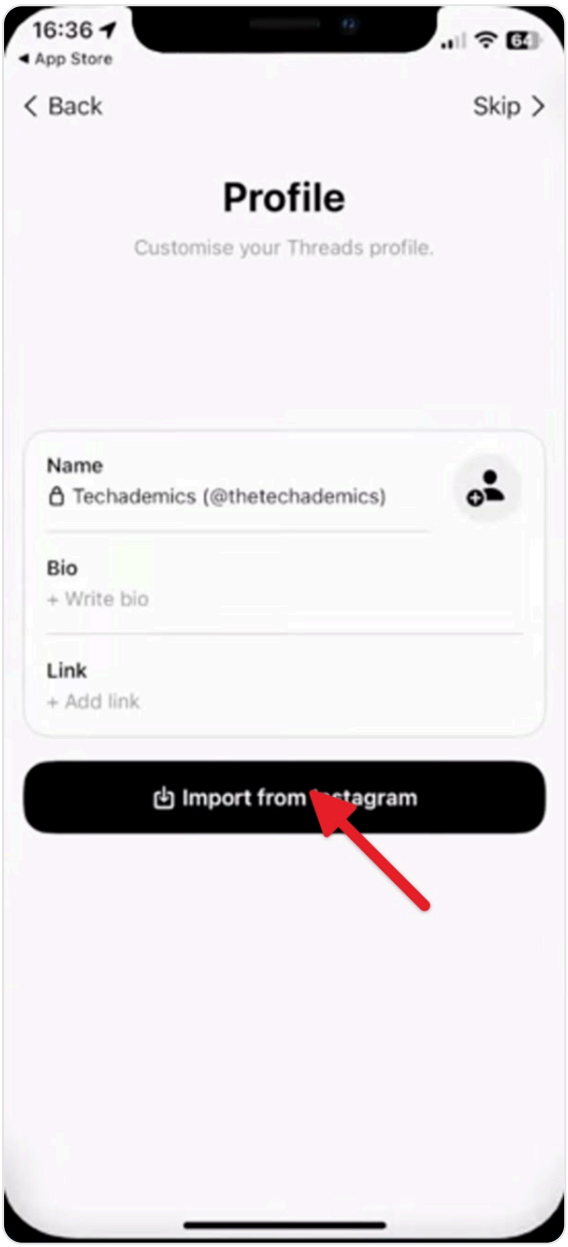

4 Import from Instagram

Profile: press **Import from Instagram**. Her name, bio and picture come across.

5 Check the profile

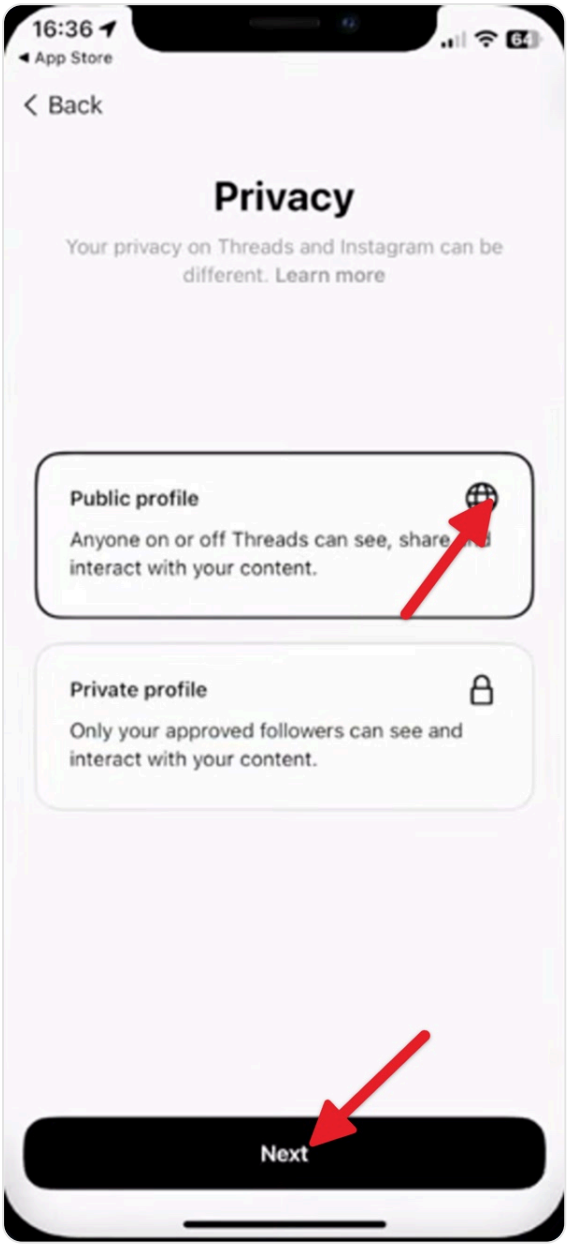

Name, bio and picture are hers. Press **Next**.

6 Privacy: public

Choose **Public profile**. Next.

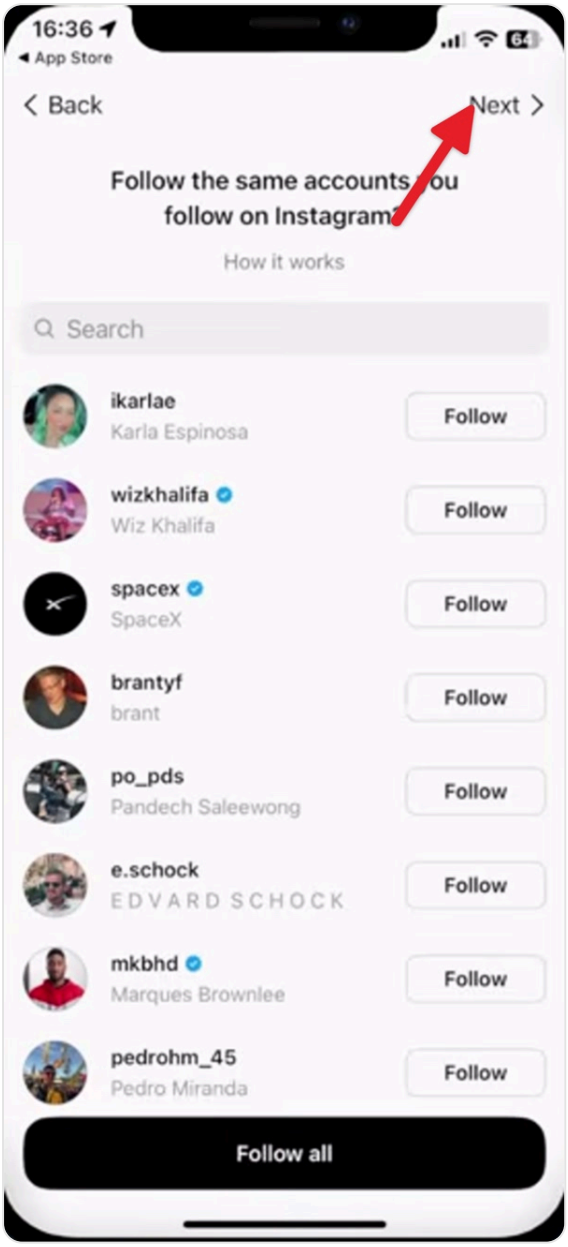

Why: a private profile can't be found. Fans have to see her.

7 Follow the same accounts: no

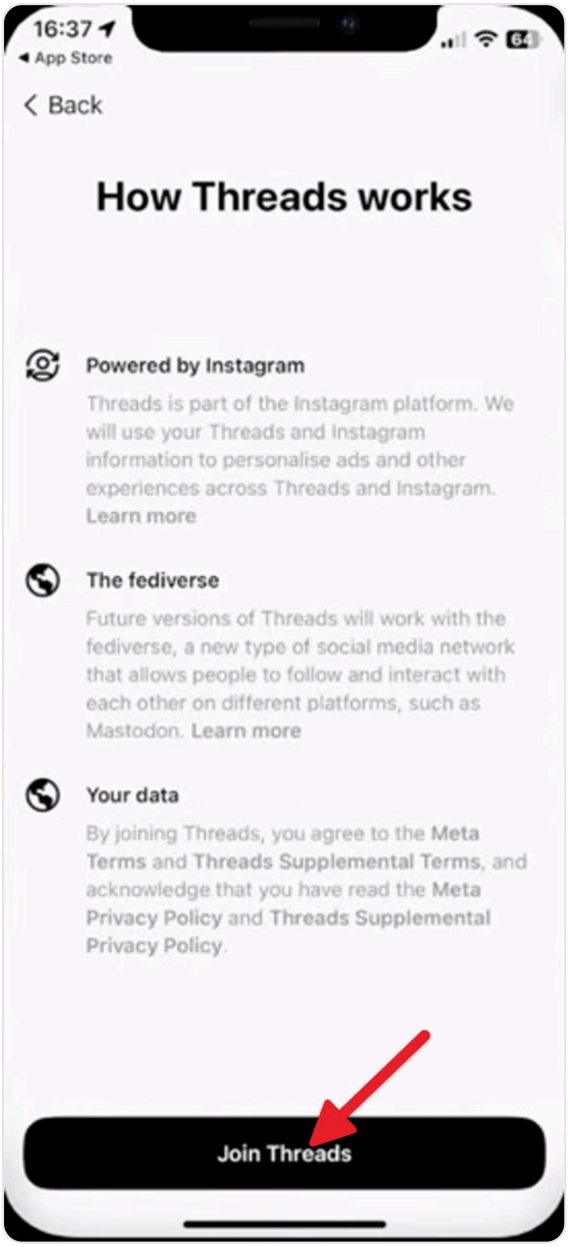

Don't press Follow all. Press **Next** at the top right.

8 Join Threads

Press **Join Threads**. You're in.

9 Hide AI comments

Do this the moment the account exists. Before anything gets posted.

Fans who find her have to feel she is real. One "this is AI" comment under a post and everyone who reads it starts to wonder. So the account hides those comments before anyone sees them.

Where: Profile → ≡ → **Privacy → Hidden Words → Manage custom words and phrases**.

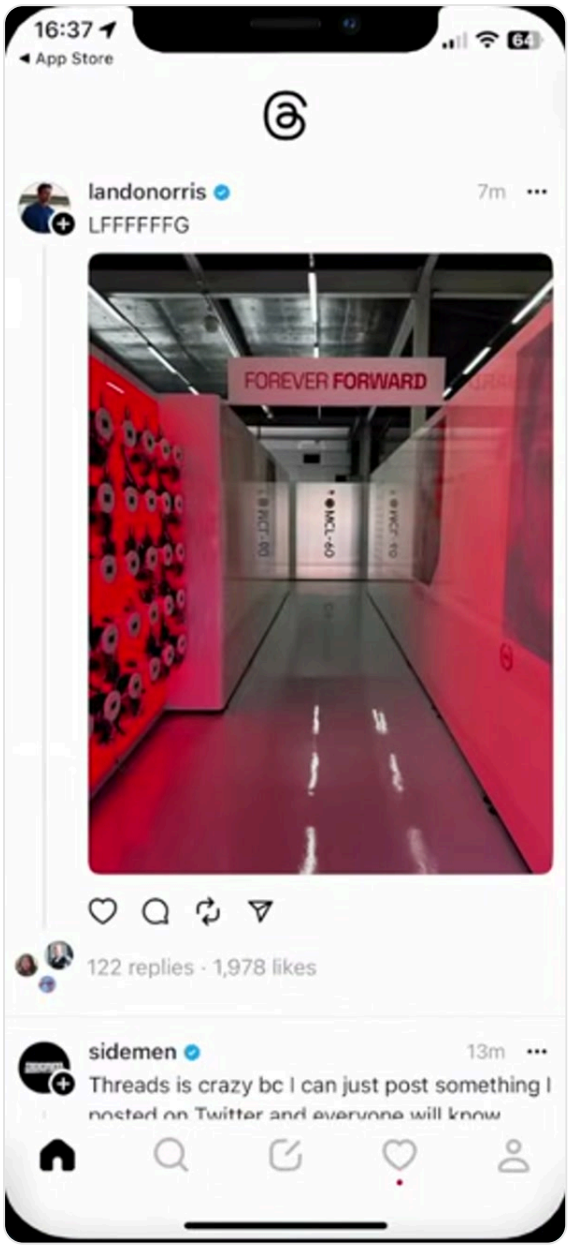

Paste this list in, then turn **Hide comments ON**:

```
ai, a.i, a.i., fake, deepfake, bot, scam, gpt, chatgpt, slop, faked, not real, midjourney
```
